

Duplicate a Bill of Materials

Modified by Phil Loughhead on Jun 15, 2017

Step 1

Make sure that the source Bill of Materials (BOM) exists, and that the target product and version has been created using the product manager. Click the duplicate button in the toolbar.

Step 2

Select the source product name and version from which to copy the BOM. Specify the target product name and version to which the BOM will be copied to. Only product and product versions which are empty (i.e. they do not already have a BOM) will be shown. Click OK to duplicate the BOM.
